

Project Executable Files

Smart Lender | Team Lead: Venkat Rajarapu | Contributor: Kollipara TejaHansika

How to Run Smart Lender Locally

1. Clone the Repository

```
git clone https://github.com/<your-username>/Smart-Lender.git
cd Smart-Lender
```

2. Install Dependencies

```
pip install -r requirements.txt
```

3. Train the Model (if model.pkl is not already present)

- Run the preprocessing script in Epic 3 - Data Pre-processing/preprocessing.py
- Run model training using functions from Epic 4 - Model Building/model_building.py
- Save the best model as model.pkl inside the Epic 5 - Application Building folder.

4. Run the Web Application

```
cd "5. Project Development Phase/Epic 5 - Application Building"
python app.py
```

Then open <http://127.0.0.1:5000/> in your browser.

List of Executable Files

File	Purpose
preprocessing.py	Cleans, balances, scales, and splits the dataset
model_building.py	Trains and evaluates DT, RF, KNN, XGBoost models
app.py	Runs the Flask web application
EDA.ipynb	Exploratory Data Analysis notebook
