

Project Demo Planning

Smart Lender | Team Lead: Venkat Rajarapu| Contributor: Kollipara TejaHansika

Demo Objective

To showcase the working Smart Lender application end-to-end, from problem statement to live prediction, within a short presentation window.

Demo Agenda

Time	Section	Presenter
0:00 - 0:30	Problem statement & motivation	Venkat Rajarapu
0:30 - 1:00	Solution overview & architecture	Venkat Rajarapu
1:00 - 2:00	Live application walkthrough	Venkat Rajarapu
2:00 - 2:30	Model comparison results	Venkat Rajarapu
2:30 - 3:00	Conclusion & future scope	Venkat Rajarapu

Pre-Demo Checklist

- Confirm model.pkl is trained and present before the demo.
- Run the Flask app locally beforehand to verify there are no startup errors.
- Prepare 2-3 sample applicant profiles in advance (one likely approval, one likely rejection).
- Have a backup screen recording in case of live demo/network issues.

Contingency Plan

If the live application fails during the demo, fall back to a pre-recorded screen capture and continue narrating the flow.
